DETAILED ACTION

Rejection of claims 1, 6, 7, and 9-21 under 35 USC 103(a) made over Roifman et al. is withdrawn in view of applicants' amendments.

Search has been extended to species other than applicants' elected specie. Claims 2, 3, 4, 5 and 8 are hereby rejoined.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 1, 2, 6, 7, 9-12 and 21 rejected under 35 U.S.C. 102(a) as being anticipated by Ranu et al. (*Journal Of Organic Chemistry* **2003**, 68, 7130-7132). In table 1, entry 10, page 7131 Ranu et al. disclose the following compound in acetonitrile (pharmaceutically acceptable solvent) which meets the structural limitations of claims 1, 2, 6, 7 and 9-12:

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 1-3 and 6-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Takeya et al. (JP 0573206, English abstract; cited in the IDS).

Scope of prior art

Takeya et al. teach a generic compound of formula R1ArCHCHCHC(CN)COB (see abstract, n= 1). R1 includes the following definitions: -OCOR7 and NR10COR11, where R7, R10 and R11 are selected from H and C1-C12 hydrocarbyl (includes alkyl). B includes definitions: -OH, NHR14 wherein R14 is a C1-C12 hydrocarbyl (hydrocarbyl

includes compounds consisting of hydrogen and carbon and therefore includes alkyl aryl such the benzyl substituent found in the instant claims 16-19).

Ascertaining the difference between instant claims and prior art

Takeya et al teach the compound generically without providing examples that anticipate the instantly claimed compounds.

Obviousness

One skilled in the art would be motivated to prepare compounds encompassed by the generic formula of Takeya et al. The compounds are described as having utility as nonlinear optic elements which provides motivation for one skilled in the art to prepare the compounds as taught by Takeya. Since the compounds of the instant claims 1-3 and 6-19 fall within the generic disclosure of Takeya, they are deemed obvious.

Claim objections

Claims 4, 5 and 20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. The specific substituents of claims 4, 5 and 20 are not suggested in prior art. Tekeya et al teach only one substituent (R1, R2 or R3) on the phenyl ring while instant claims 4, 5 and 20 require

two. Ranu et al teach an ester moiety as instant R4, while claim 20 requires a benzyl amide.

Conclusion

Claims 1-21 and 30-37 are pending

Claims 30-37 are withdrawn.

Claims 1-3, 6-19 and 21 are rejected.

Claims 4, 5 and 20 are objected to.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
